

APPOINTMENT.

Hugo Vogelsang of Germany have appointed Project Pumps the Australian Distributors for the Vogelsang range of Rotary Lobe Pumps.

Since 1929, Vogelsang have been a world leader, manufacturing a range of high quality, extremely dependable sludge handling and pumping products for the industrial, municipal and agricultural markets of the world. Vogelsang pumps are designed using the LifeGuard principle and, as a result, are unmatched when it comes to durability and ease of maintenance.

With the release of the HiFlo pulsation free rotors, used exclusively in the Vogelsang positive displacement, rotary lobe pump, they lead the world in Rotary Lobe Pump technology.

Vogelsang will complement Project Pumps exclusive range of product which includes the Haigh Macerators, ACE Screeners and Lisep Conditioning Packages as well as the Corro Chemical Resisting range of products to be able to provide a complete package of waste water products.

For further information regarding the Vogelsang range of pumping equipment please contact Ben or Peter Frazier on 02 9709 8864 or email to ben@projectpumps.com.au.
